PROJECTS

Frontend Gym Web Application

- Description: Developed a comprehensive gym web application using React.js, focusing on modular component design.
- Role: Frontend Developer
- Responsibilities - Created interactive UI components to enhance user experience and engagement.
 - Utilized state management effectively in various components to maintain application state.
 - Implemented responsive design principles to ensure usability across devices.
- Impact: Successfully developed a functional prototype that enables users to interact with gym services, showcasing my skills in React.js and front-end development.

Real Estate Frontend Web Application

- Developed an interactive and fully responsive frontend web application for real estate using React.js.
- Implemented animation effects and scrolling number library to enhance user experience.
- Designed user-friendly sign-up forms ensuring comprehensive validation for data entry.
- Utilized modern CSS frameworks (Tailwind CSS, Bootstrap) for aesthetic UI design, optimizing performance across various devices.
