

SARTHIK KHANNA

Full Stack Developer | React.js, Next.js, Node.js, TypeScript
Chandigarh, India | +91 9855328428 | sarthikkhanna28@gmail.com
linkedin.com/in/sarthik-khanna-05650a276 | github.com/sarthik-khanna

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying production web applications using React.js, Next.js, Node.js, and TypeScript. Skilled in RESTful API design, relational and NoSQL database modeling, secure authentication, and generative AI integration with the Google Gemini API. Final-year B.E. Computer Science (AI & Data Science) student who has independently delivered complete platforms from database design through production deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, RESTful API Design, Server-Side Rendering
Databases: MongoDB, MySQL, PostgreSQL (Neon), Firebase Firestore
Authentication & Cloud: Firebase Authentication, Clerk, AWS, Vercel
AI & ML: Google Gemini API (LLM Integration), Pandas, NumPy, scikit-learn
Tools: Git, GitHub, Postman, n8n (Workflow Automation)
Soft Skills: Cross-Functional Collaboration, Problem-Solving, Ownership, Communication, Time Management

PROFESSIONAL EXPERIENCE

Full Stack Developer | Needle Ads Technology

Chandigarh, India | Aug 2026 – Present

- Engineered and shipped two production websites, RadioBillPay and FastMyPC, using Next.js, React.js, Node.js, and TypeScript
- Implemented server-side rendering and code-splitting in Next.js to improve page load performance and SEO across both sites
- Designed RESTful APIs and secure middleware routes for automated customer licensing and subscription-management workflows
- Partnered with the design and product teams to translate UI/UX wireframes into accessible, production-ready web interfaces

PROJECTS

Code-X | Next.js, TypeScript, Tailwind CSS, Firebase (Auth & Firestore), Google Gemini API, Monaco Editor

- Built a full-stack coding practice platform end to end, comprising a Next.js and TypeScript frontend, Google authentication, and a Firestore data model for problems, submissions, and hint history
- Designed a four-level AI mentor on the Google Gemini API with server-side hint-progression gating via the Firebase Admin SDK, preventing users from skipping to hints they have not yet unlocked
- Engineered a custom code execution engine that grades submissions against visible and hidden test cases, plus an admin panel for adding new problems without code changes
- Implemented RESTful Next.js API routes and kept hidden test-case data server-side to prevent client-side tampering

RadioBillPay | Next.js, React.js, TypeScript, Tailwind CSS

- Developed and deployed radiobillpay.com, a four-page SiriusXM billing and account-management website covering payment guidance, subscription details, and a callback-request contact flow
- Delivered responsive, SEO-friendly pages with Next.js and Tailwind CSS and released them directly to production

FastMyPC | Next.js, React.js, TypeScript, Tailwind CSS

- Developed and launched fastmypc.com, a marketing and licensing website presenting six core PC-optimization features: disk cleaner, duplicate finder, disk analyzer, startup manager, app uninstaller, and large file finder
- Built a customer license-management portal and a free-scan download flow that enables users to manage their subscriptions online

Truecaller Extractor | Python, Tkinter, Playwright, BeautifulSoup, Multithreading

- Built a Windows desktop app in Python and Tkinter that automates phone number lookups through browser automation and replaces manual searches with a GUI for single and batch (Excel/CSV/TXT) lookups
- Engineered a Playwright automation layer that persists authenticated browser sessions using token-based sign-in detection, so it doesn't need to re-authenticate on every run, and that supports both headless and visible modes
- Designed a data extraction pipeline that combines HTML parsing (BeautifulSoup, CSS selectors, vCard decoding) with API response interception and falls back across multiple data sources on each page

EDUCATION

Chandigarh Group of Colleges, Landran

Mohali, India | Aug 2023 – Jul 2027

Bachelor of Engineering, Computer Science (AI & Data Science) | CGPA: 7.0/10.0

- Relevant coursework: Data Structures and Algorithms, Database Management Systems, Web Engineering, Machine Learning
- Active participant in technical clubs and coding contests

CERTIFICATIONS

- AWS Certified Cloud Operations, Amazon Web Services (2024)
- MERN Stack Development, Certification Program (Jun 2025)

ACHIEVEMENTS

- Runner-up, Smart India Hackathon 2025 (national-level competition)
- Champion, State-Level Handball Championship 2022 (represented the state)
